(OR)

(b) Read the comprehension and answers the questions below:

Marie curie was one of the most famous scientists in history. She was born in 1867 in Warsaw, Poland, displayed a brilliant mind and a blithe personality. Her interest in learning prompted her to continue her studies after high school. She entered the Sorbonne, a French University, where she earned her master's degree and doctorate in Physics.

Marie and Pierre were married in 1985 and spent many productive years working together in the physics laboratory. They discovered radium but Pierre was killed by a horse-drawn wagon in 1906. Marie was stunned. They had two daughters and it increased her distress. She joined as a

physics professor at the Sorbonne in her husband's place, she was the first woman professor in the university and received Nobel price. Her discovery of radium is used for treating cancer. Regardless of her own personal loss, she dedicated herself to science.

1. Who is Marie Curie?
2. What did Marie and Pierre discover?
3. What happened to Pierre Curie?
4. Write about the education of Marie Curie?
5. What is Marie's position in the Sorbonne University?
6. How does Marie's discovery benefit the mankind?
